

Traffic signs are devices placed along, beside, or above a highway, roadway, pathway, or other route to guide, warn, and regulate the flow of traffic, including motor vehicles, bicycles, pedestrians, equestrians, and other travelers.

Signs, like any other traffic control devices, must meet five fundamental requirements:

- Fulfill a need
- Command attention
- Convey a clear, simple meaning
- Command respect from travelers
- Give adequate time for proper response

In the next articles you will get an overview of all traffic signs existing in Greece with an adequate and short explanation of their meaning. You will find them categorised in
